

ALL YOU HAVE TO DO IS PLAY

When it comes to spending your free time there are more important things to do than tending to your swimming pool. Thanks to PV3™, the automatic in-floor pool cleaning and circulation system, your pool can be built to clean itself while you relax. Built right into the pool shell PV3™ is engineered to clean your entire pool, including floors, steps, benches, even spas. When not operating, PV3™ disappears back into the pool floor, making it virtually invisible. There are no vacuum hoses left floating in the pool. All that's left is a sparkling clean pool that's ready to enjoy.

PV3™ is custom-designed for your unique pool shape. It is so effective that it will clean 99% of your entire pool, guaranteed, as well as significantly reduce heating and chemical costs for the life of your pool.

- CLEANS ENTIRE POOL
- ALWAYS SWIM READY
- 99% CLEANING GUARANTEED
- ENHANCED CIRCULATION
- SAVES ON CHEMICAL & ENERGY COSTS
- NO ROUTINE MAINTENANCE
 - LIMITED LIFETIME WARRANTY ON NOZZLES
 - WORLD'S #1 IN-FLOOR CLEANING SYSTEMS COMPANY
- INFINITE POSITION NOZZLE WITH NO MOVING PARTS

HOW IT WORKS:

1. Pop-up nozzles are placed in floors, steps, benches and even spas to clean the entire pool.*
2. Pop-up nozzles work together to sweep debris to the pool's main drain and skimmer area.
3. An optional **MDX Debris Removal System™ with anti-entrapment technology removes large debris.
4. An optional debris canister collects the large debris for convenient disposal.*
5. The PV3 automatic water valve functions as the brain of the system and directs a powerful flow of water to each set of cleaning nozzles. The low profile water valve requires no routine maintenance, and is also 100% pressure safe.

8 DESIGNER COLORS TO CHOOSE FROM

*Debris containment canister and nozzles in steps, benches, swimouts, and spa are optional.
 **MDX must be installed in accordance with MDX installation manual and local codes, which includes the proper installation of all anti-entrapment features including the SDX Safety Drain; and either, one of the 4 vacuum breaker installation methods – or a vent line or approved Suction Vacuum Relief System (SVRS).
